

1. 全部位 All sites

2. 食道がん Esophageal cancer

3. 胃がん Stomach cancer

図は主要部位のがん死亡率について全国と比べて各都道府県の死亡率が何倍高いかを標準化死亡比 (SMR) という比で表したものである。SMRは地域間の年齢分布の違いを補正して比較するための指標である。

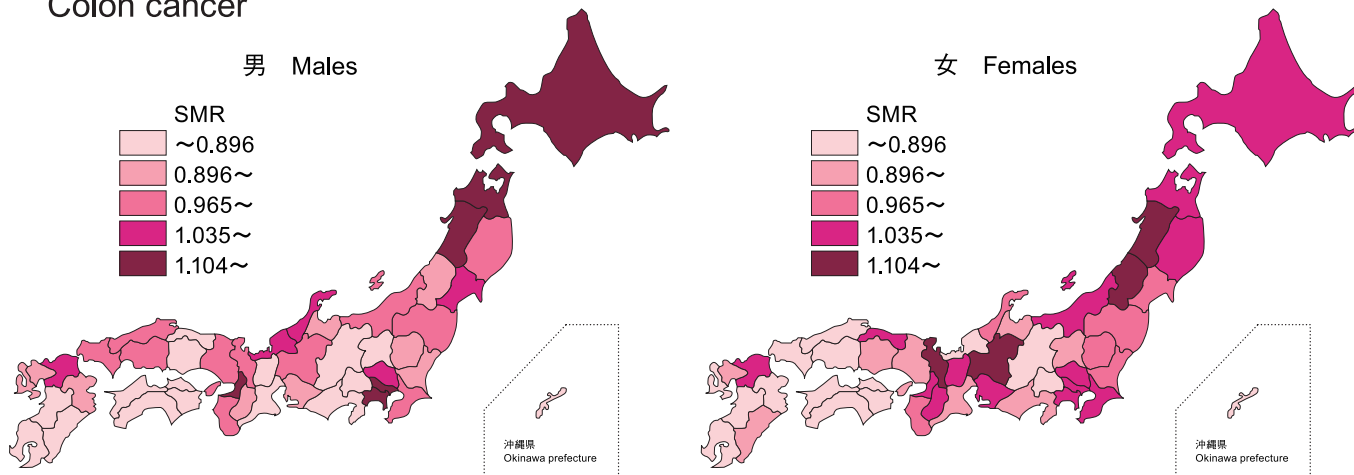

がん死亡やがん罹患の地理分布は、各地域に住む住民の生活習慣など、様々な環境要因の違いを反映すると考えられ、がん対策を推進する上で貴重な情報を提供する。

Each map shows the geographical distribution of cancer mortality of major site by the standardized mortality ratio (SMR), which indicates the ratio of mortality in a prefecture as compared to that of the whole nation after adjustment of difference in age distribution.

The geographical distribution of cancer incidence and mortality provides crucial information for cancer prevention and control, because it often reflects the differences in lifestyle and other environmental factors of the region.

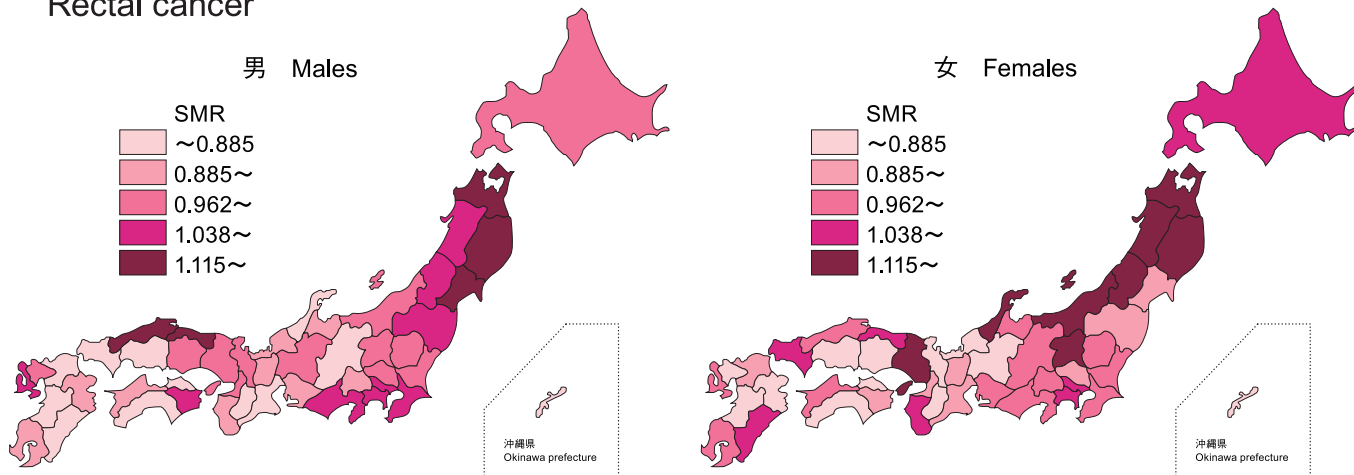

4. 結腸がん

Colon cancer

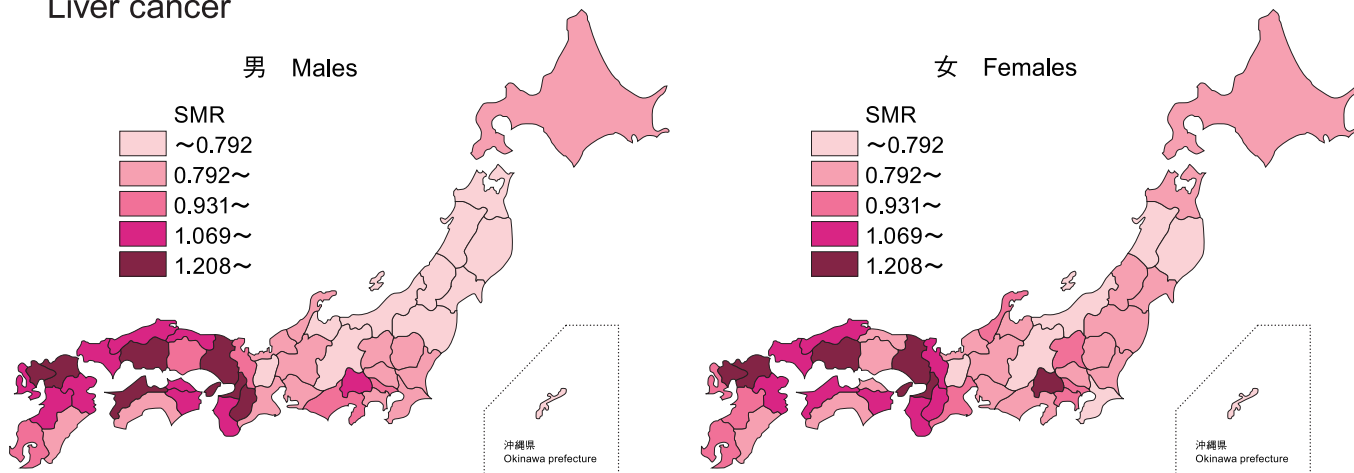

5. 直腸がん

Rectal cancer

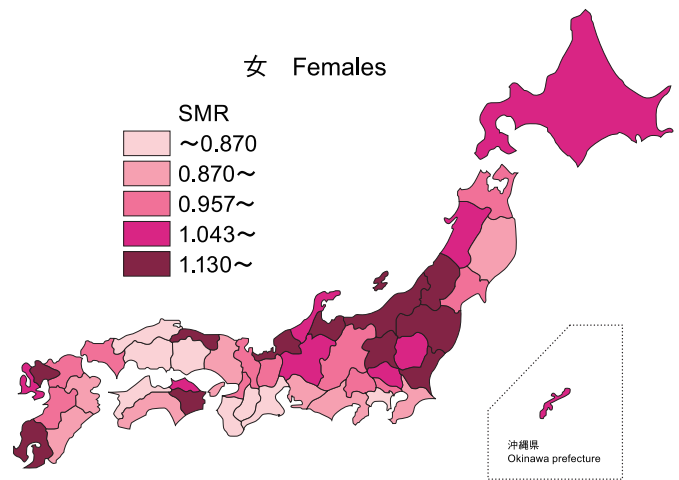

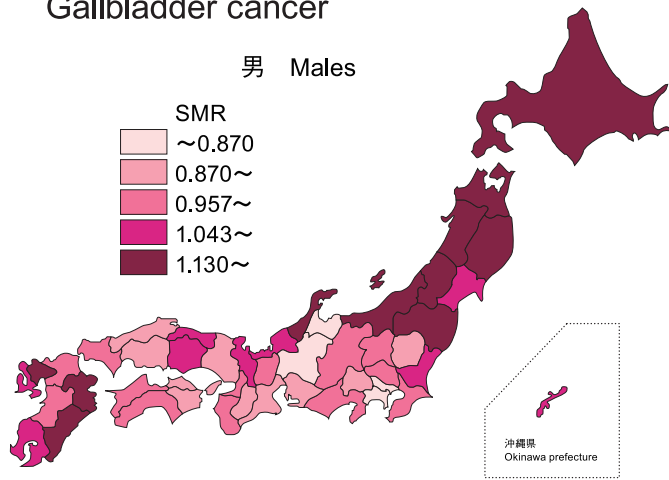

6. 肝臓がん

Liver cancer

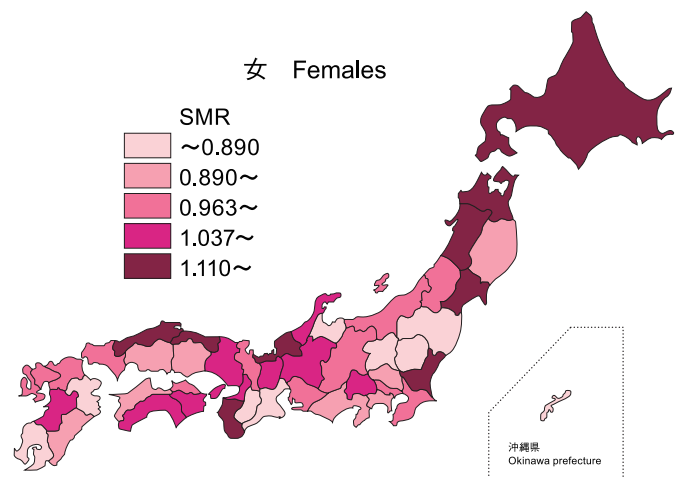

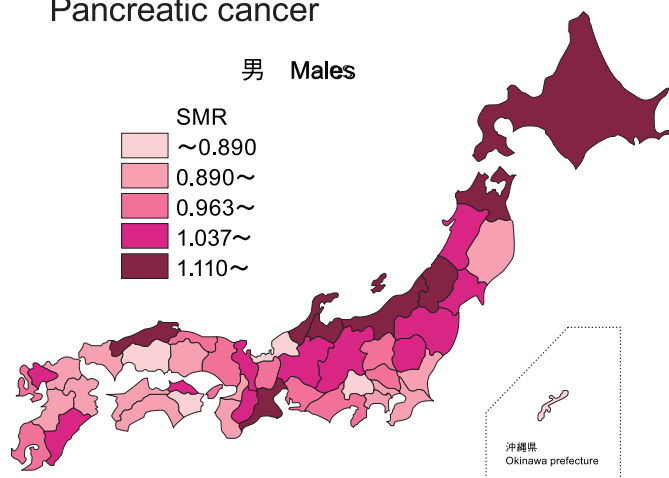

7. 胆のうがん

Gallbladder cancer

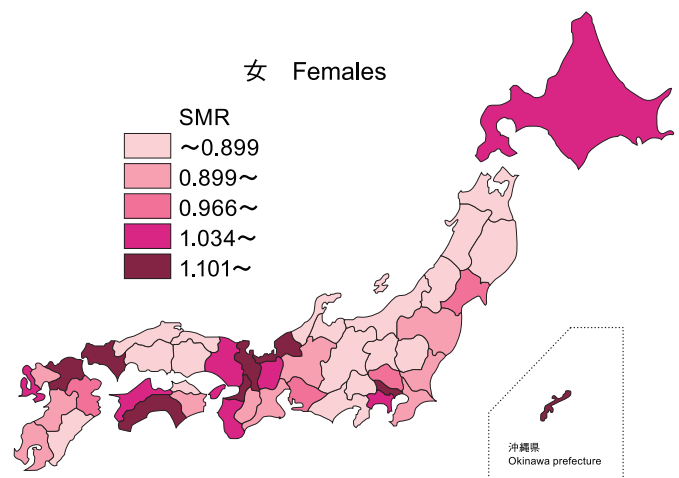

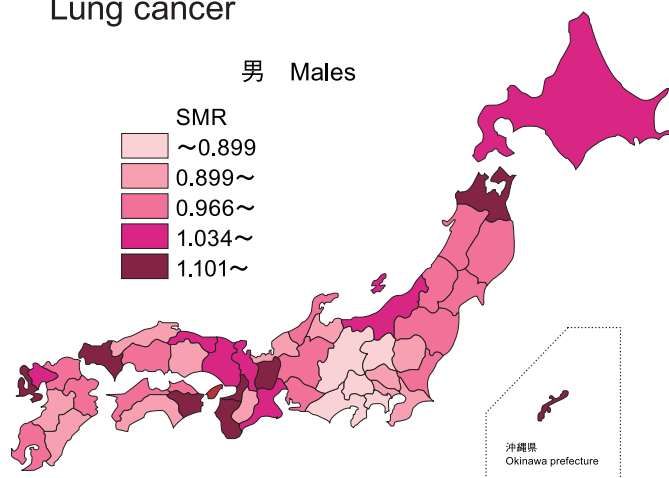

8. 膵臓がん

Pancreatic cancer

9. 肺がん

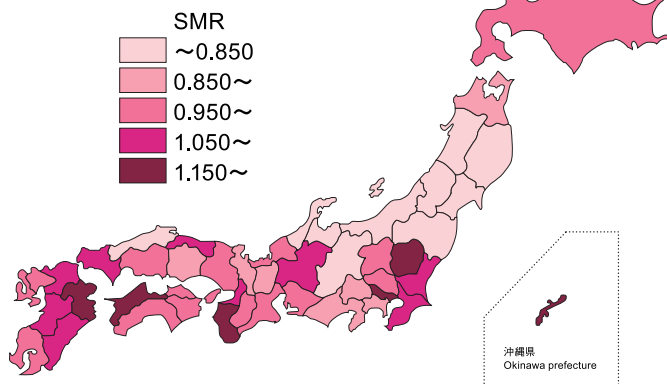

Lung cancer

10. 子宮がん

Uterine cancer

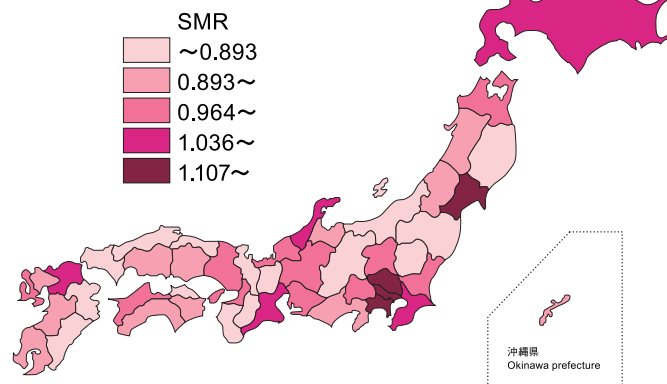

女 Females

11. 乳がん

Breast cancer

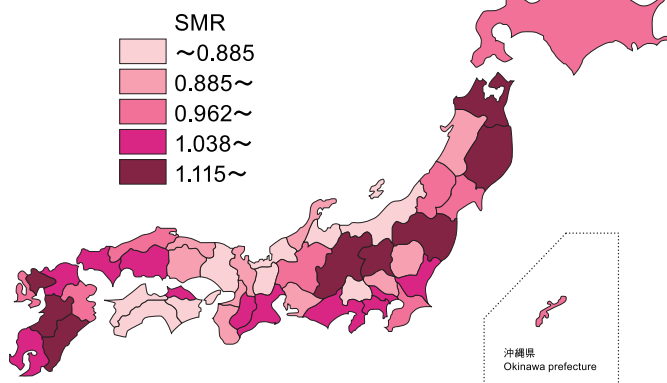

女 Females

12. 前立腺がん

Prostate cancer

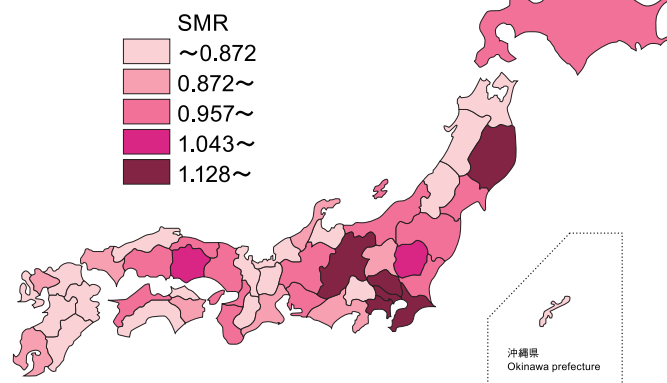

男 Males

13. 卵巣がん

Ovarian cancer

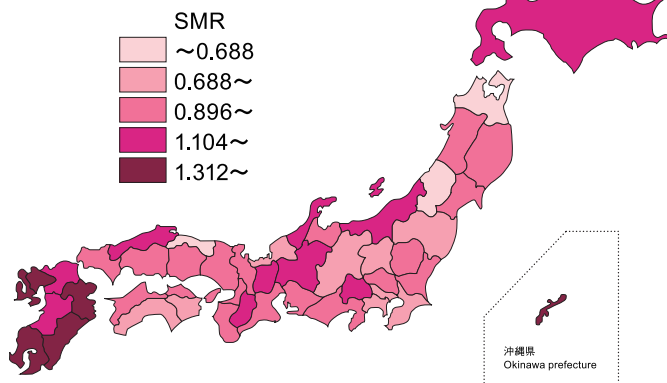

女 Females

14. 白血病

Leukemia

男 Males

女 Females
